Vodka Gummy Bears

Time 2-5 days

Ingredients

- Gummy bears
- Vodka

Steps

1. Put gummy bears in a bowl, preferably metal or non-plastic. Pour over vodka until all the gummy bears are submerged. Cover bowl with plastic wrap or lid and refrigerate.
2. Stir at least once per day to ensure bears aren't sticking together. Vodka will be completely absorbed after 2-5 days.

Notes

Works with gummy worms, too.
